	<b>Automating Serverless Architectures in O365</b>
<b>14:00</b>	<b>Off-the-Shelf Serverless Automation</b> Jon Noble, Live Services Specialist, Sage Sometimes we might spend time building automation when we already have tools available to us that can achieve the same thing by writing very little code at all. There are services in Office 365 which might be thought of as knowledge worker things, but can make life easy for other people in orgs where everyone has O365
	<b>Securing your cloud workloads</b>
<b>14:45</b>	<b>Security posture management for your cloud workloads</b> Michael Stephenson, Cloud & Integration Architect, Connected Systems Consulting Microsoft uses a wide variety of physical, infrastructure, and operational controls to help secure Azure—but there are additional actions you need to take to help safeguard your workloads. Turn on Security Center to quickly strengthen your security posture and protect against threats.
<b>15:30</b>	<b>Afternoon Refreshments, Networking &amp; Exhibition</b>
	<b>Unified Comms &amp; Collaboration Journeys</b>
<b>16:00</b>	<b>UNIFIED COMMUNICATIONS &amp; COLLABORATION TECH JOURNEY AT WRIGLEYS SOLICITORS</b> GAV BRINING, IT DIRECTOR & BRENDON HIGGINS, TECHNICAL ARCHITECT WRIGLEYS SOLICITORS
<b>16:30</b>	<b>Highlights of the day, summary and discussions followed by GEEK Out at the bar</b>

TechUG would not take place without the continued support of our Sponsors - Thank You
