kubernetes

docker

SHOW SOME CODE CALLUM!

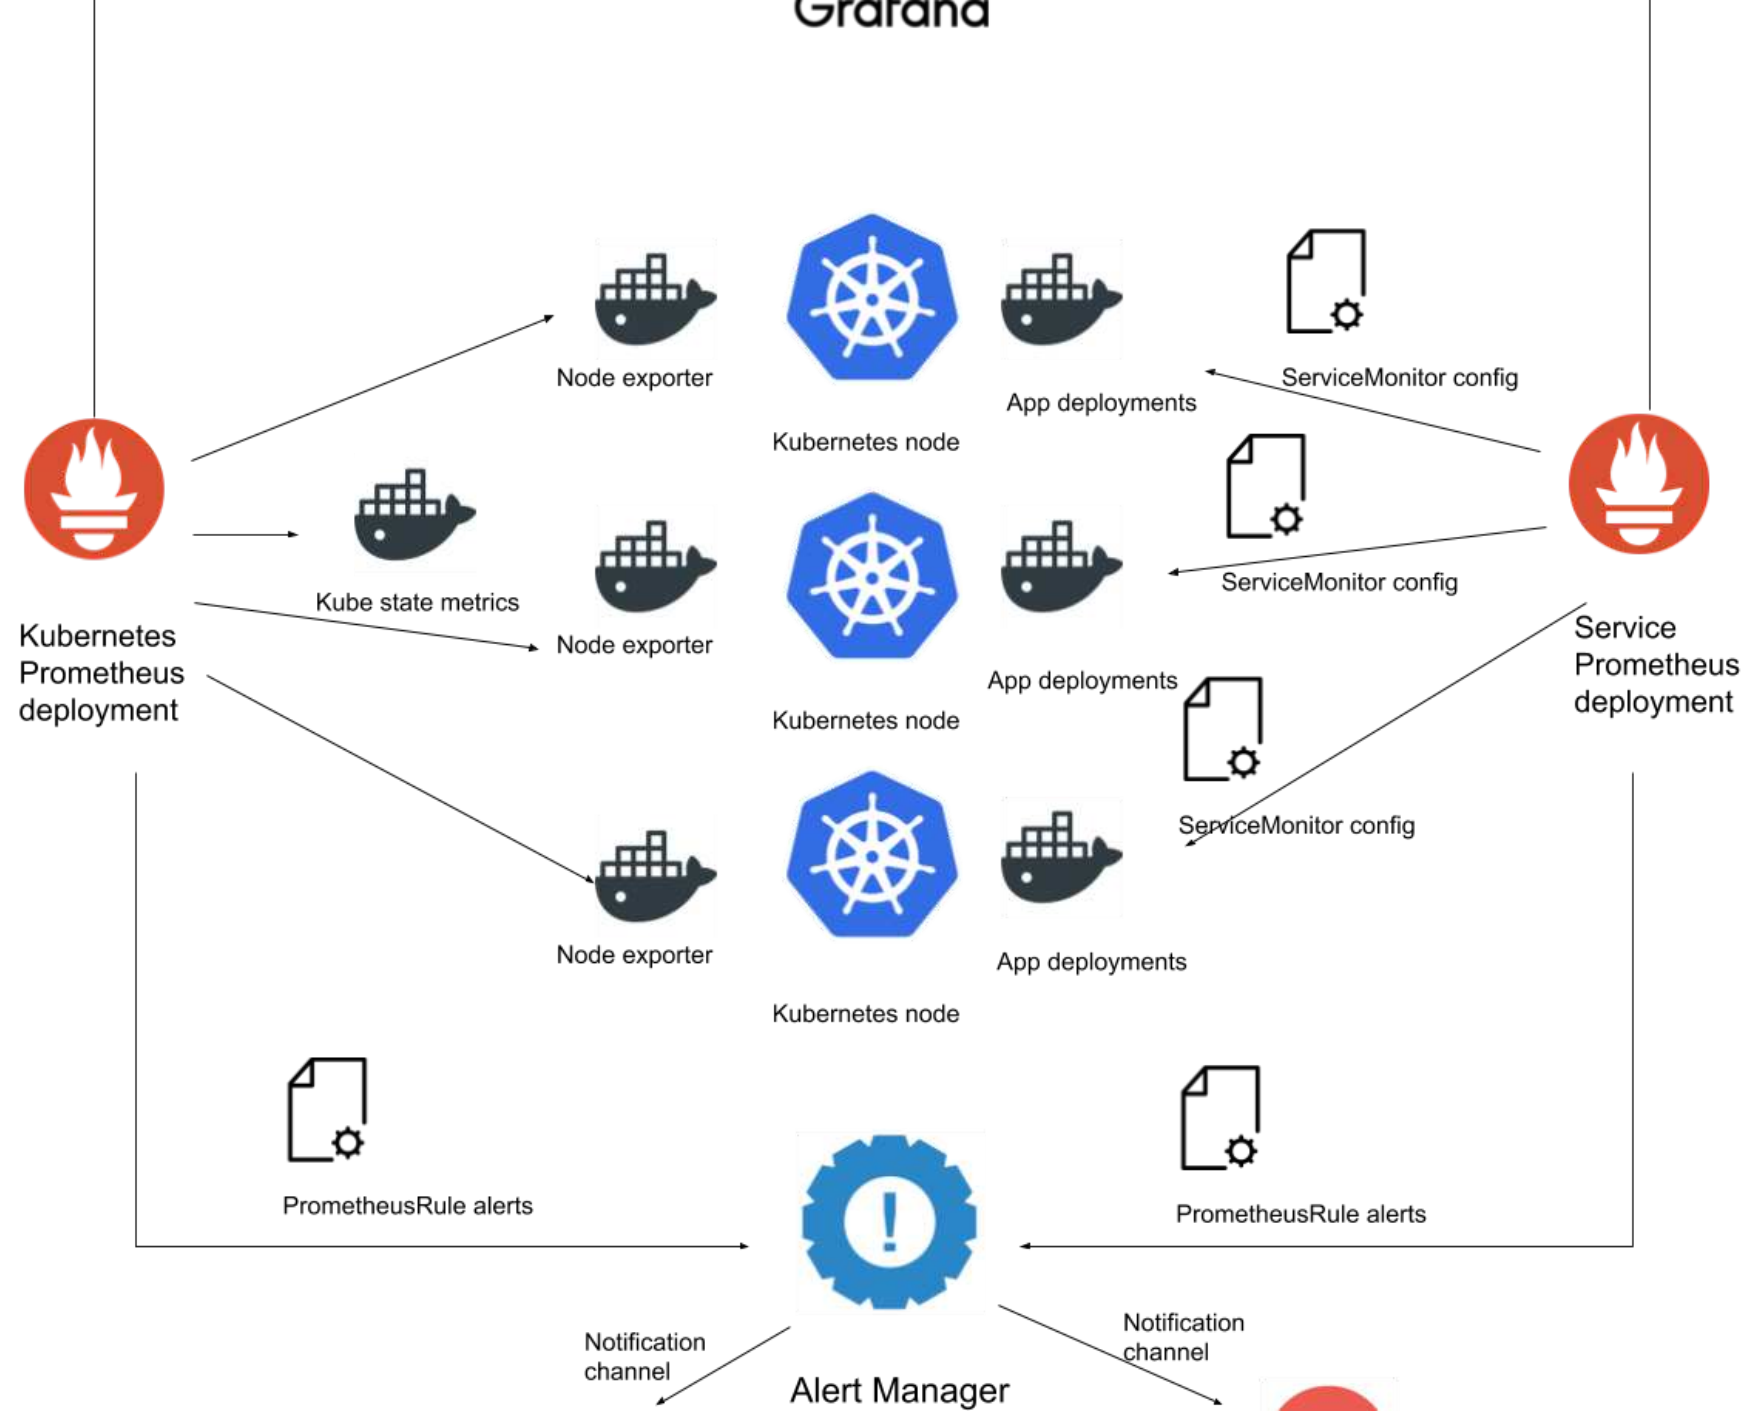

- Creating a dockerfile from a centos image and then installing nodejs.
- Copying in my revealJS application.
- Tagging the docker image with a recognisable name.
- Pushed to the docker hub (you can go use it yourself if you want!!).
- Ran that image on my k8s cluster (minikube).

kubernetes

Graranda

**SHOW SOME DASHBOARDS! AND
MOAR CODE!**

- Deploying a prometheus monitoring cluster using helm.
- Demonstrated the capabilities of k8s cluster monitoring.
- Show slack channel receiving alerts.
